PROFESSIONAL SUMMARY

Full-Stack Developer and AI Implementation Engineer specializing in Python, React (Next.js), and Agentic Workflow Automation. Ranked in the Top 8,000 Prompt Engineers globally on PromptBase. Proven ability to architect secure backend APIs (Django/DRF) and build highly interactive, modern frontend applications. Specialist in mitigating LLM hallucinations through custom diagnostic protocols, bridging complex server-side logic with scalable, user-centric web solutions.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js (App Router), TypeScript, Tailwind CSS, Framer Motion, Zustand, shadcn/ui.
- **Backend & Databases:** Python, Django, Django REST Framework (DRF), SQL, MySQL.
- **AI & Automation:** Agentic Workflow Design, Prompt Architecture, Hallucination Mitigation, JSON Task Structuring.
- **Tools & Deployment:** Git, GitHub Actions, Vercel, Postman, RESTful APIs, Unit Testing.
- **Core Concepts:** SDLC, OOP, SOLID Principles, Data Structures, Agile Methodologies.

PROFESSIONAL EXPERIENCE & PROJECTS

Commercial AI Logic Architect | PromptBase (March 2026 – Present)

- Ranked #7,935 globally for technical prompt architecture and diagnostic tool development.
- Engineered a "Self-Correcting Diagnostic Suite" to automate the debugging process for backend developers.
- Developed a "Wait-and-Request" protocol (Agentic Workflow) that forces AI models to validate system context before code generation, significantly reducing runtime errors.
- Utilized Multimodal Vision capabilities to automate the identification of UI crashes and map them to backend database repairs.

Full-Stack Developer | [Sibha](#) (Islamic Web Application) (2026)

- Architected and deployed a modern, ad-free web application serving as a digital Tasbeeh and Quran reader using **Next.js, TypeScript, and Tailwind CSS**.
- Integrated the AIQuran.cloud REST API to fetch and render dynamic Arabic text and stream verse-by-verse audio recitations.
- Implemented persistent state management using LocalStorage to save user-customized Dhikr sessions and counter progress.
- Designed a premium, accessible UI featuring a seamless Light/Dark mode toggle, glassmorphism effects, and smooth transitions using **Framer Motion**.

Frontend Engineer | [Dynamic Habit Tracker](#) Dashboard (2026)

- Built a highly interactive, client-side habit tracking dashboard using **React, TypeScript, and Zustand** for robust state management.
- Engineered a custom scheduling algorithm using `date-fns` to calculate complex repeating intervals and backfill missed days.
- Developed a "Living Background" UI that dynamically crossfades color palettes based on real-time daily completion status.

- Utilized **shadcn/ui** to build complex "page-on-page" detail sheets, rendering 12-week heatmaps and generating shareable PNG progress cards.

Backend Developer | P2P Exchange Platform (2025)

- Developed a full-stack marketplace using **Python and Django**, focusing on secure transaction logic.
- Architected MySQL database schemas and implemented token-based authentication for secure user access.
- Automated backend event handling using Django Signals and custom middleware.

Backend Python Developer | Automated Data Collection API (In progress)

- Designed a Python-based data scraper and integration tool to fetch real-time environmental datasets via WeatherAPI.
- Automated the extraction, parsing, and console visualization of JSON-formatted external data.
- Built and validated a production-ready E-commerce API using Postman to ensure robust token authentication and data security.

EDUCATION

Bachelor of Science: Communication and Electronics Engineering

Alexandria University | October 2022 – Ongoing

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, Advanced Mathematics.

CERTIFICATIONS & QUALIFICATIONS

AI Developer Professional Certificate (IBM) (Sep 2025 – Ongoing)

- Completed 5/10 modules covering the full AI development lifecycle.

- *Key Skills:* Generative AI Applications, Prompt Engineering, Python for Data Science.

[ALX Alumine: Backend Web Development \(Django-REST Framework\)](#)

(Jan 2025 - Sep 2025)

- Mastered Python Fundamentals, OOP, and Database Management (SQL/MySQL).
-
